

FIRE PROTECTION SOLUTIONS

ABOUT COMPANY

Safety by Obligatory Not by Choice

Cease Fire Solutions (CFS) is a leading Fire Protection Solutions provider in the Middle East. It has an immaculate track record in protecting people and property. Promoted with a vision of quality service to the place, where safety and security of people and property are the prime importance, Cease Fire Solutions endeavors to develop a long-term and mutually beneficial business relationship with Clients. As an one-stop provider, we supply, design, install and maintain fire products and systems. We also provide various allied services including consultation and advice from our engineering experts.

Managing Director

MESSAGE

Vinu Kuruvilla

Dear Customers,

As the Managing Director of CFS, I am proud to lead a team of specialists who are committed to providing our customers with intelligent recommendations and solutions for their fire protection needs. We understand that every customer's situation is unique, and we take the time to carefully study each situation before making recommendations.

Our commitment to service excellence and technical expertise is what sets us apart from other fire protection companies. We have well-trained field crews and the most completely equipped workshop facility for the inspection and repair of fire protection and safety equipment. In addition, our team is also available for you to solve any problem to assist with Qatar Civil Defense approvals or to provide any information you may.

I would like to express my sincere gratitude to our customers for their continued support. We are grateful for the opportunity to serve you and we look forward to continuing to build strong relationships with you in the years to come.

Sincerely,

Vinu Kuruvilla

Why US ?

Unmatched Expertise

With years of experience in the industry, we have honed our skills and expertise in providing comprehensive fire protection solutions. Our team consists of highly trained professionals who understand the unique challenges and requirements of fire safety in Qatar.

Cutting-Edge Technology

We stay at the forefront of fire protection technology, ensuring that our solutions are always up-to-date and effective. From state-of-the-art detection systems to advanced suppression methods, we deploy the latest tools to safeguard your property.

Customized Solutions

We understand that every space is different. That's why we offer tailor-made fire protection plans to suit your specific needs. Whether it's a residential building, a commercial complex or an industrial facility, our solutions are designed to provide optimal safety.

Compliance and Regulations

Navigating the complex landscape of fire safety regulations can be daunting. We have an in-depth understanding of Qatar's fire safety codes and regulations, ensuring that all our solutions are fully compliant.

Cost-Effective Solutions

We understand the importance of budget considerations. Our solutions are designed to be both effective and cost-efficient, offering you the best value for your investment.

Proven Track Record

Our portfolio includes a wide range of successful projects, from small-scale installations to large-scale industrial solutions. Our track record speaks volumes about our commitment to excellence.

MISSION

To create value for our clients, employees and suppliers by harnessing the power of hard work, integrity and innovation thereby fostering development and accelerating growth.

& VISION

To be the leading fire protection company in Qatar, known for our expertise, innovation and commitment to safety. We strive to create a world where fire incidences are prevented and people & property are always protected.

Fire is a slow starter but a good finisher; beat it at the start.

OUR DIVISIONS

Project

We design, install and maintain Fire Detection, Firefighting systems and Emergency & Exit Light System to protect people and property.

Service & Maintenance

We provide comprehensive service and maintenance for all type of Fire Detection System, Firefighting System and Emergency & Exit Light system. We also sign contract with our Oil & Gas clients for Long Term Service Agreement.

Trading & Distribution

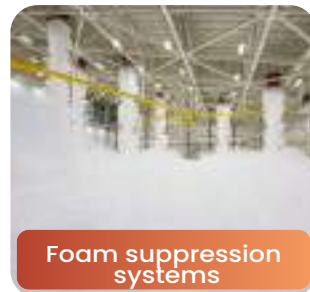

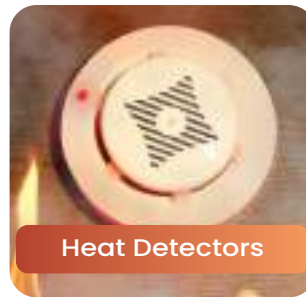

Supply of fire protection products and equipment with expert advice and support.

Fire can strike at any time and it's important to be prepared. Our company offers a comprehensive range of fire detection and suppression services to protect your property and people from the devastating effects of fire.

Project

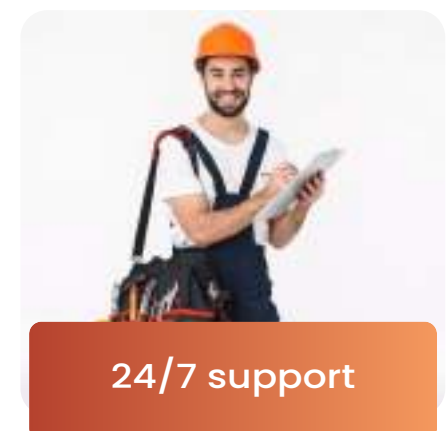

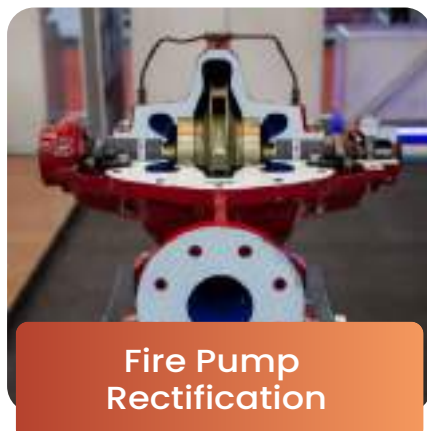

Our project division provides a comprehensive range of services to protect the people and property from fire accidents. We design, install, commission and maintain fire detection & firefighting systems for all types of buildings and facilities. We work with commercial, industrial and oil and gas sectors. Our project team have well versed experience to handle critical projects. We also offer a range of training courses to help your staff understand and use your fire safety systems effectively.

Service & Maintenance

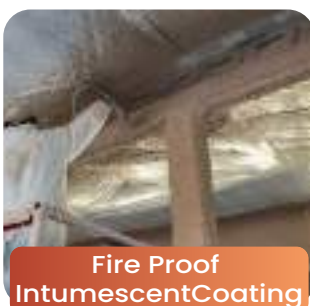

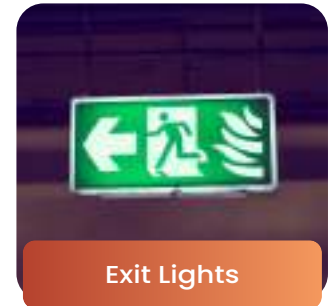

We believe that well-maintained fire systems are essential for saving lives and property. That's why we offer a comprehensive range of fire system service and maintenance solutions for businesses of all sizes. By regularly servicing and maintaining your fire protection equipments, our field staff ensures they are functioning properly and can be relied on in an emergency. To achieve this, we have earned expertise in a wide range of fire protection equipment, including those manufactured by other organizations. We train our field staff how to diagnose faults and dismantle or install the fire protection equipment as swiftly as possible without disrupting your operations.

We are very committed to the safety of our clients, their associates and property, which is why we maintain a Research and development division to ensure we are always update and at the forefront of the latest fire-fighting technologies.

Trading & Distribution

We promote fire safety by providing innovative solutions all under one roof. For leading product manufacturers, CFS maintains a healthy stockpile of fire-fighting material all around the year. All the products distributed by us come with necessary third-party approvals from labs like UL, BRE, BSI etc and possess civil defense approvals for use in Qatar.

Trading, Supply, Installation & Maintenance of Fire Rated Doors

Fire-rated doors are an essential part of any fire safety plan. They are designed to slow the spread of fire and smoke, giving you and your loved ones more time to escape. Fire-rated doors are required by law in many commercial and residential buildings and they can also be used in homes to improve safety.

We are a leading provider of fire-rated doors, offering a wide range of services to meet your needs. We can help you select the right doors for your application, supply you with high-quality doors from trusted manufacturers, and install them to the highest standards. We also offer comprehensive maintenance and repair services to

Hydrostatic Testing, Refilling & Servicing

Hydrostatic testing is a non-destructive test that is used to check the integrity of pressure vessels, such as the cylinders used in fire extinguishers, fire hoses and breathing air cylinders. The test involves filling the cylinder with water and then applying a pressure that is greater than the maximum operating pressure of the cylinder. If the cylinder can withstand the test pressure without failing, then it is considered to be safe for use.

- Fully fledged work shop facility
- Automated dry powder filling station.
- Any size of hoses can be tested in short time.
- Software operates test functions and records test results
- Test range of 2000-10,000psi in automated mode
- Hydrostatic Testing Of High Pressure & Low Pressure Cylinders
- Fully Automated & Latest Machineries

Fireproof Coatings

Fireproof coatings are a highly effective way to protect your property from fire damage. These coatings are applied to surfaces to create a barrier that prevents flames from spreading and reduces the amount of smoke produced.

At CFS, we offer a comprehensive range of fireproof coating services. Our experienced team can help you choose the right coating for your specific needs and budget, and we offer a variety of application methods to ensure a professional finish. Whether you need to protect your commercial building, your home or your industrial facility, we can help.

Intumescent Fireproof Coating

A thin coating that expands and chars when exposed to heat, forming a barrier that protects the underlying substrate from fire.

Cementitious Fire Proof Painting

A thick layer of cement-based coating that provides fire protection by creating a physical barrier between the fire and the underlying substrate.

Supply, Inspection, Testing, Maintenance & Certification

We provide a comprehensive range of services for SCBA, EEBA, portable gas detectors, area monitors and air quality tests, including:

● Supply

We offer a wide selection of equipment from leading manufacturers, all at competitive prices.

● Inspection, testing and maintenance

Our qualified technicians can perform all necessary inspections, tests and maintenance to ensure that your equipment is in safe working condition.

● Certification

We can provide certification for all types of respiratory protection equipment, giving you peace of mind that your employees are protected.

We are a renowned name in this field and supply many solutions related to this scope:

- Breathing Air Compressors
- SCBA/EEBA
- Airline System
- Cascade Systems

Ensuring Your Safety in Any Environment

Marine Services

Inspection and Maintenance of Fire Extinguishing Systems

Fire safety is essential for any marine vessel and having properly inspected and maintained fire detection & protection system is a vital part of ensuring the safety of your people and property. At CFS, we sell marine specified fire protection equipment as per client requirement. Our dedicated marine service team working around the clock to meet the client requirement for their inspection and certification services and corrective maintenance requirement.

Inspections

We will thoroughly inspect your fire extinguishers to ensure that they are properly charged, free of defects and ready to use.

Maintenance

We will perform all necessary maintenance on your fire extinguishers, including cleaning, hydrostatic testing and replacing any worn or damaged parts.

Recharging

We will recharge your fire extinguishers using only the highest quality extinguishing agents.

Marine Services

Inspections & Maintenance Of Self-Contained Breathing Apparatus

Self-contained breathing apparatus (SCBA) is essential safety equipment for marine personnel working in hazardous environments, such as confined spaces, engine rooms and during firefighting operations. To ensure that SCBA is always in good working order, it is important to have it inspected and maintained regularly by a qualified marine service provider.

Our company provides comprehensive marine services for inspections and maintenance of SCBA. Our team of experienced and qualified technicians is certified by major SCBA manufacturers and can service and maintain all types of SCBA equipment.

Our services include:

- Inspecting SCBA components for wear, damage & proper function
- Testing SCBA airflow and pressure
- Performing hydrostatic testing of SCBA cylinders
- Repairing and replacing SCBA components

Civil Defence

Renewal Certification

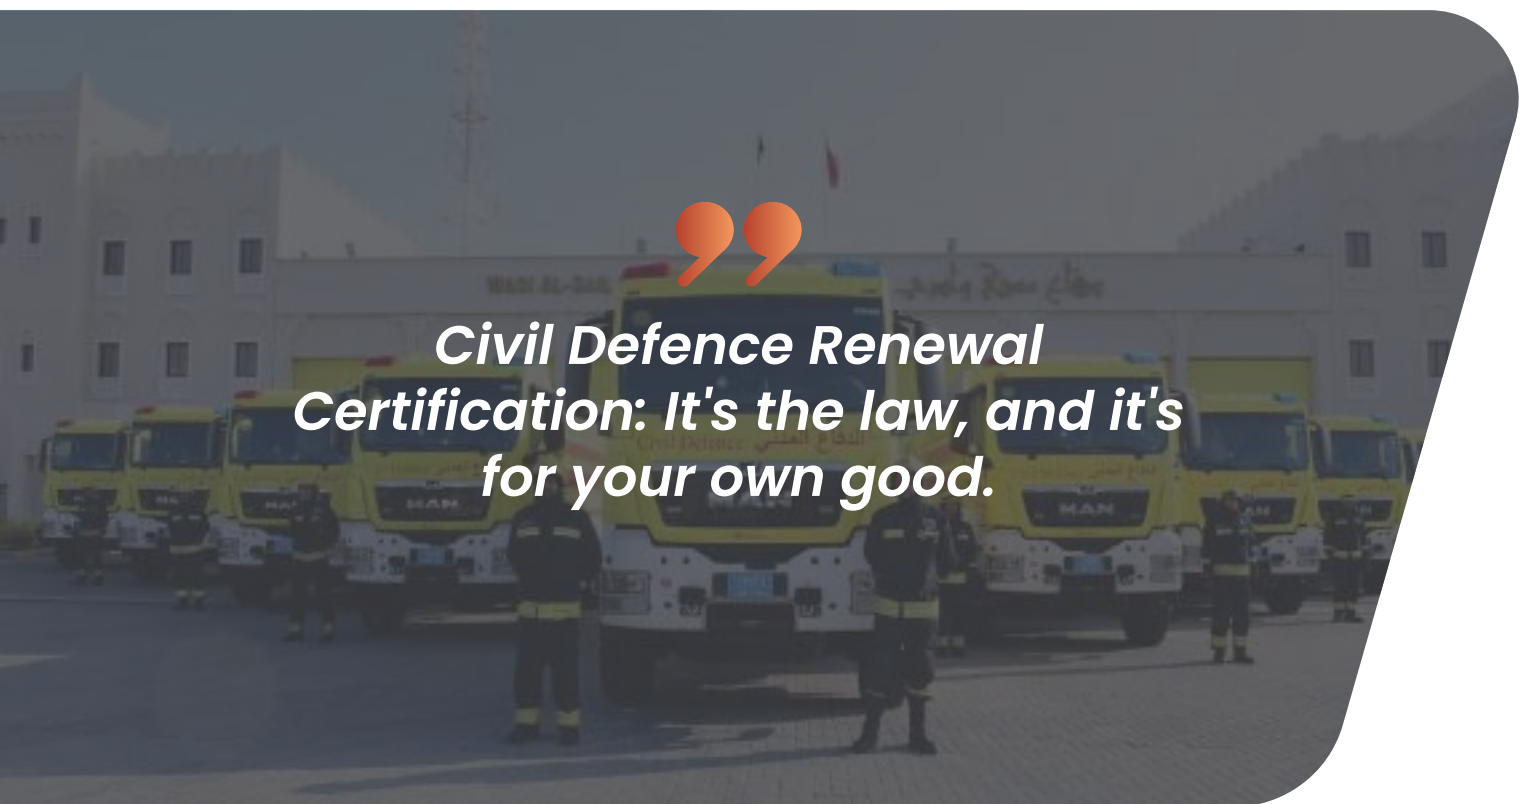

If you are looking to renew your building license, you will need to get a certificate from the Qatar civil defence. Cease Fire Solutions can help you with that.

We can help you with:

- **Building and safety inspection**
- **Fire and safety company certification**
- **Civil defence certification**
- **Hazardous material permit**
- **Obtain approval for any fire protection equipment.**
- **Obtain approvals for buildings such as hotels, villas, malls, schools, including any residential or commercial building.**

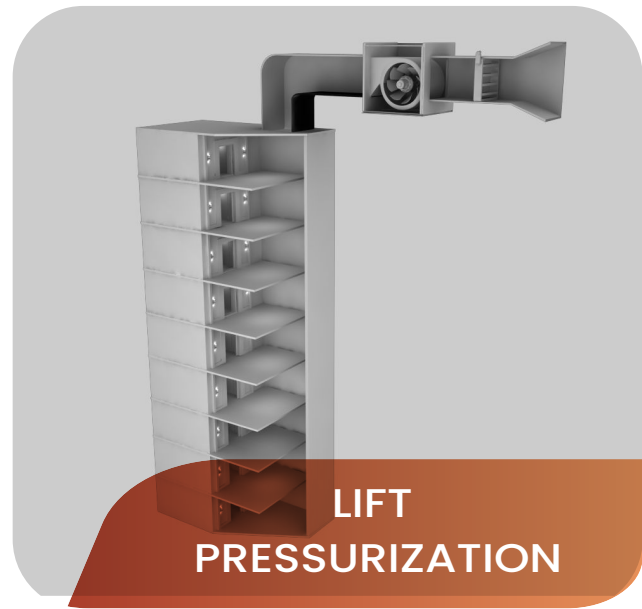

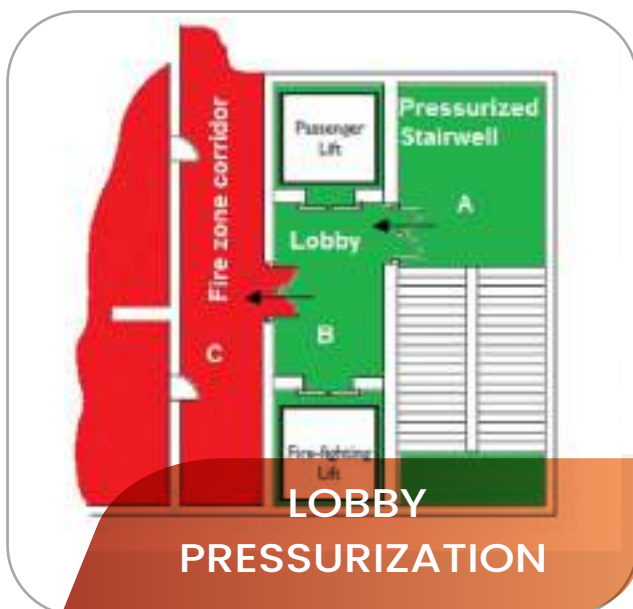

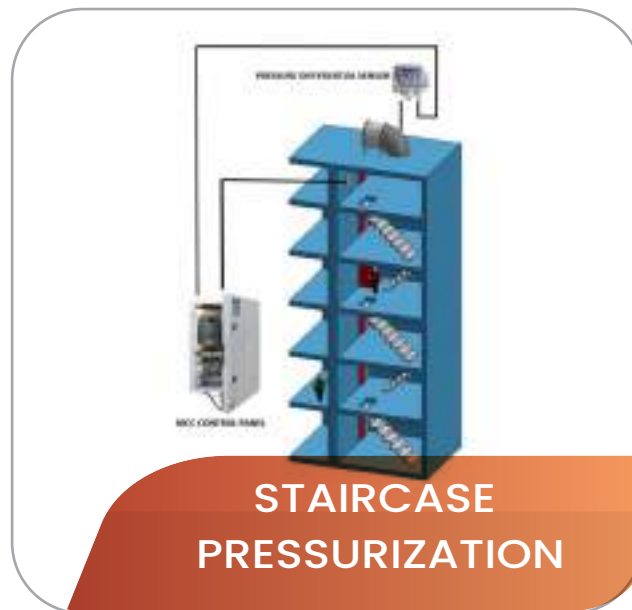

Civil Defence Renewal Certification: It's the law, and it's for your own good.

Pressurization System In Buildings

One of the most dangerous situations that one can face in a building is smoke. A fire breakout can be damaging, but the smoke causes most injuries. In high-rise buildings, the stairs are usually the primary source of exit during an emergency. The exit stairs need to be free of smoke. High-rise buildings must install pressurization systems to help keep the smoke out. Cease Fire Solutions is a professional company providing innovative fire solutions such as installing pressurization systems to ensure the safety of individuals in buildings.

Ventilation **Systems**

Whether it's a residential or commercial building, efficient and high-quality ventilation systems are mandatory. Not only does it ensure good air quality, but it also helps in reducing air leakage, controls air moisture and prevents mold growth and structural damage.

At Cease Fire Solutions, we have a team of experienced and knowledgeable specialists and professionals who can help you with efficient and smart ventilation systems for your property. From installation to maintenance, you can trust us to take care of all your ventilation needs with utmost care and safety. Keeping our customers' safety as the number one priority, all our products and services are well thought and specially curated to meet your needs

Types of ventilation systems:

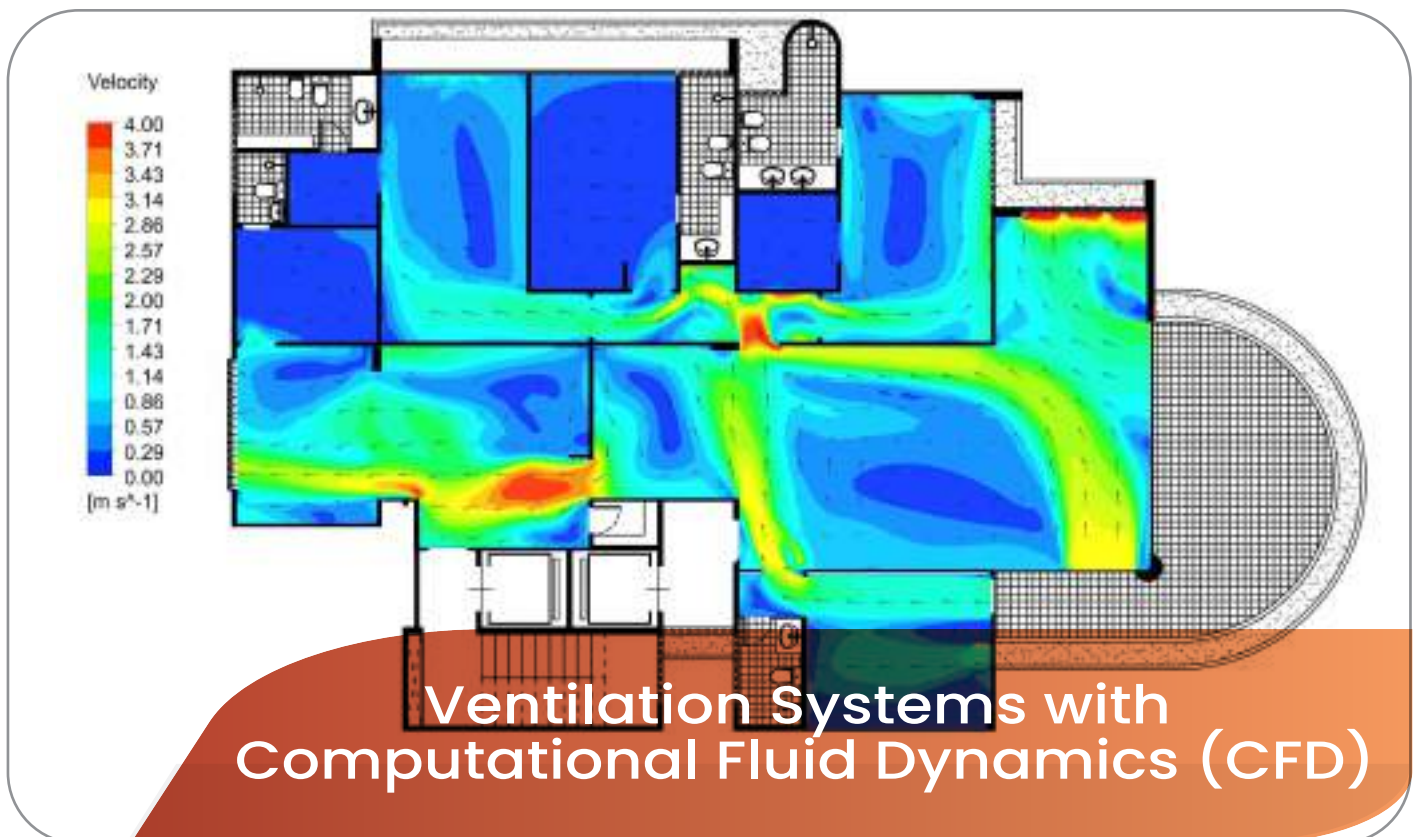

- **Exhaust ventilation systems**
- **Supply ventilation systems**
- **Balanced ventilation systems**
- **Energy recovery ventilation systems**
- **Dry ventilation systems / tunnel ventilation systems**
